Onboarding — Welcome (Step 1 of 3)

Setup

Step 1 of 4

Welcome Home.

Let's start by giving your cafe a digital identity that feels as warm as your first brew of the morning.

What's the name of your cafe?

Full Audit Cafe

Upload your logo

Click to browse or drag and drop

PNG, JPG or SVG (Max. 2MB)

💡

Pro Tip: Your logo looks best on a transparent background. If you don't have one yet, you can skip this and add it later!

< Back

Continue >

FEATURES ON THIS SCREEN

- Cafe name input
- Logo upload dropzone

Onboarding — Cafe Type (Step 2 of 3)

← Setup

Step 2 of 4

What's your style?

Pick the setup that best matches your space so we can tailor your workspace.

Coffee Shop
Espresso bar & quick service

Bakery
Pastries, bread & desserts

Full Restaurant
Dine-in with table service

Bar & Lounge
Drinks, tapas & evening service

How do you serve customers?

✓ Dine In

✓ Takeaway

Delivery

QR Ordering

 **Pro Tip:** You can enable more service modes anytime from Settings once you're up and running.

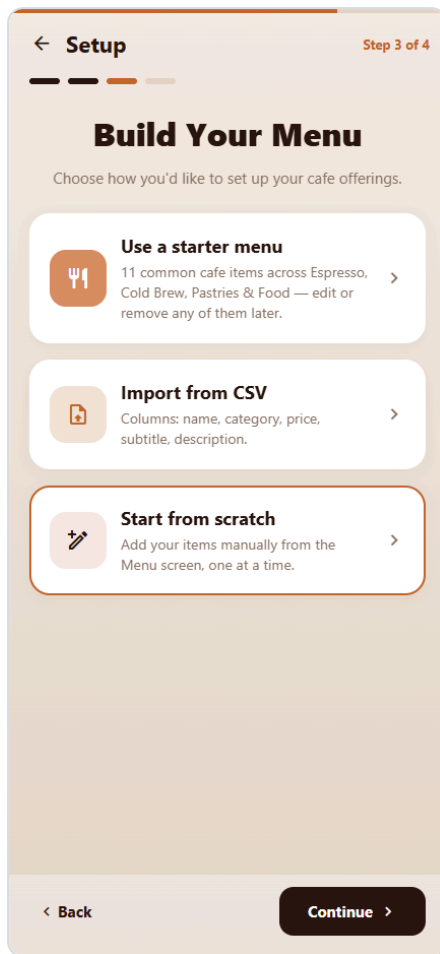

< Back

Continue >

FEATURES ON THIS SCREEN

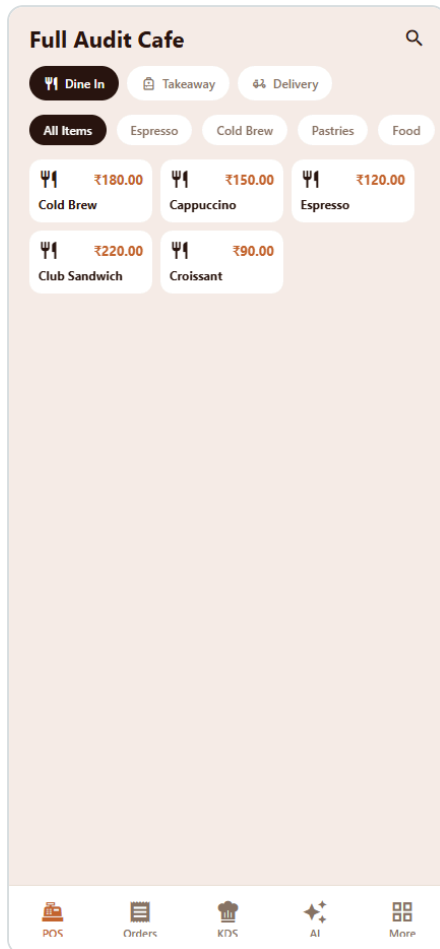

- Cafe style selection: Coffee Shop / Bakery / Full Restaurant / Bar & Lounge
- Service mode selection: Dine In / Takeaway / Delivery / QR Ordering (multi-select)

Onboarding — Build Menu (Step 3 of 3)

FEATURES ON THIS SCREEN

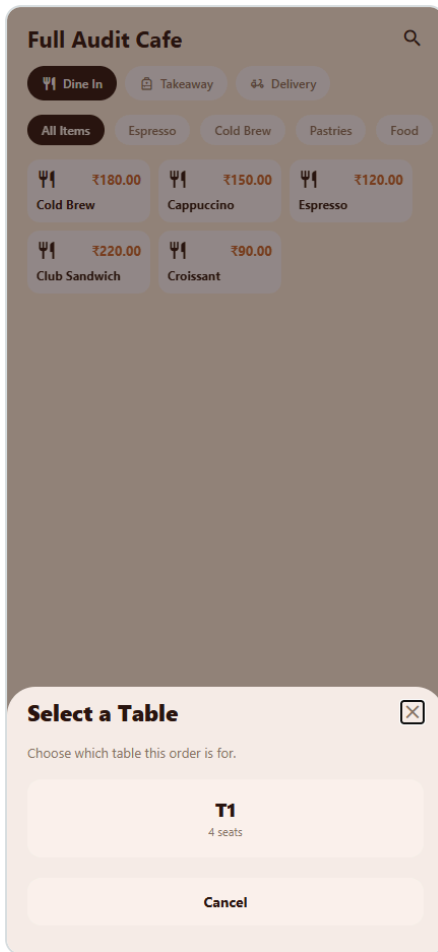

- Use a starter menu (11 common cafe items, pre-written)
- Import from CSV (name, category, price, subtitle, description columns)
- Start from scratch (add items manually later)
- Finishing this step completes onboarding and lands on the real Menu screen

FEATURES ON THIS SCREEN

- Order type selector: Dine In / Takeaway / Delivery
- Category filter tabs, driven by the real menu
- Menu item grid with live prices
- Tap-to-add cart with running item count and subtotal
- Collapsed cart bar with Fire button

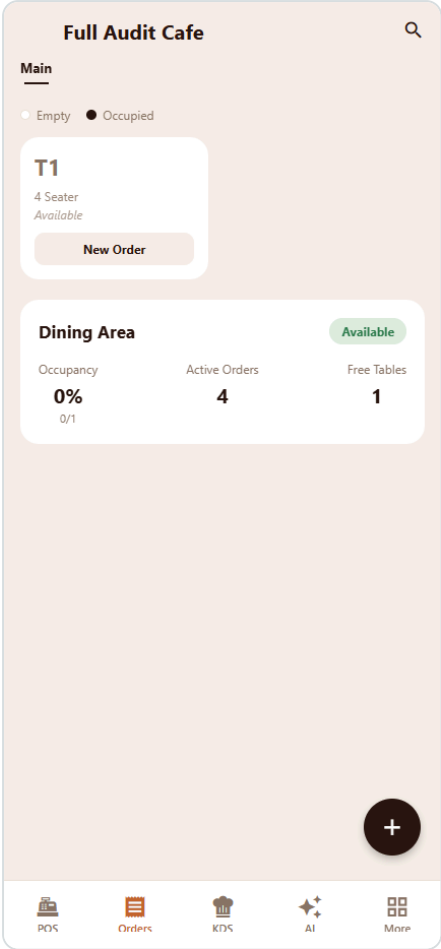

POS — Fire to Kitchen (Dine-in Table Picker)

FEATURES ON THIS SCREEN

- Required table selection before a dine-in order can fire
- Shows only real, currently-available tables with seat count
- Cancel returns to the cart without losing it

Orders (Table & Order Hub)

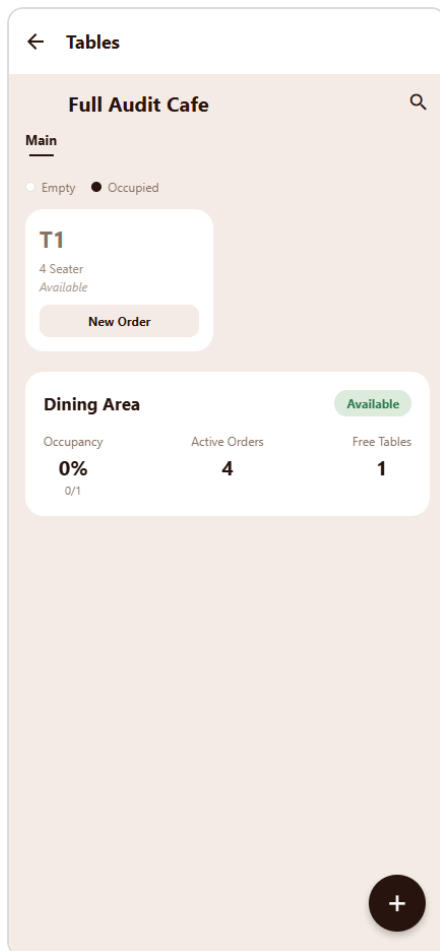

FEATURES ON THIS SCREEN

- Zone filter (e.g. Main)
- Empty / Occupied table status toggle
- Per-table card: seats, availability, "New Order" shortcut
- Dining-area summary: occupancy %, active orders, free tables
- Floating "+" to add a new table

11

POS & KITCHEN

Table Management

FEATURES ON THIS SCREEN

- Same table/zone/occupancy view as the Orders hub, reached from the main menu
- Add Table action

- Favorite item, lifetime spend, visit count
- Recent activity feed
- Quick links: Coupons, Gift Cards, Favourites, Order History
- New Order and Edit Profile shortcuts

CRM — Order History (per customer)

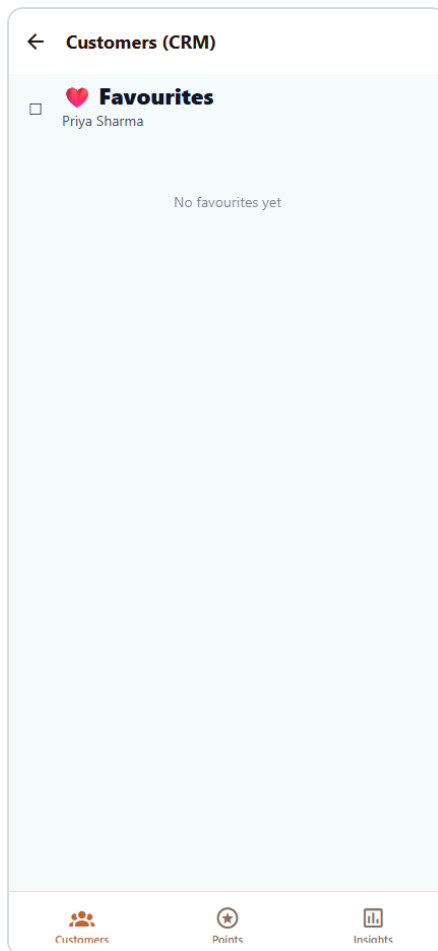

FEATURES ON THIS SCREEN

- Full past-order list for the selected customer
- Correct empty state when a customer has no orders yet

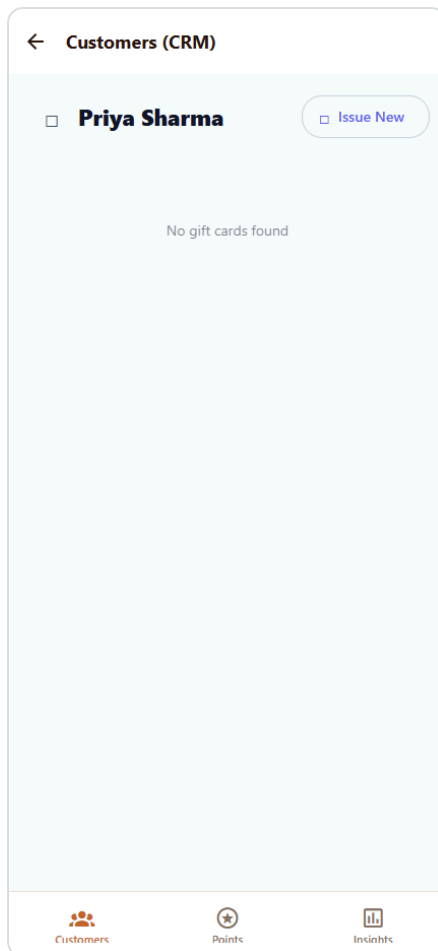

FEATURES ON THIS SCREEN

- Active coupon count
- Per-coupon: type (e.g. % Discount), title, description, code, expiry
- Redeem action

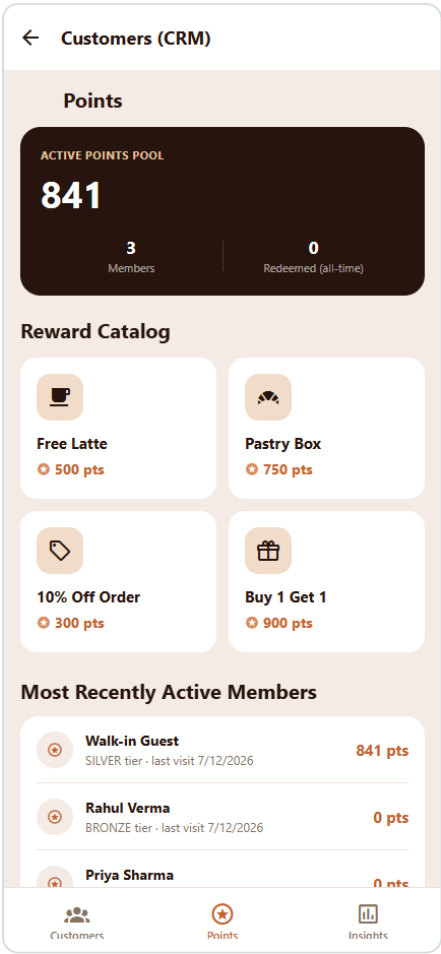

FEATURES ON THIS SCREEN

- Most-ordered items for this customer, built automatically from order history
- Correct empty state for a customer with no orders yet

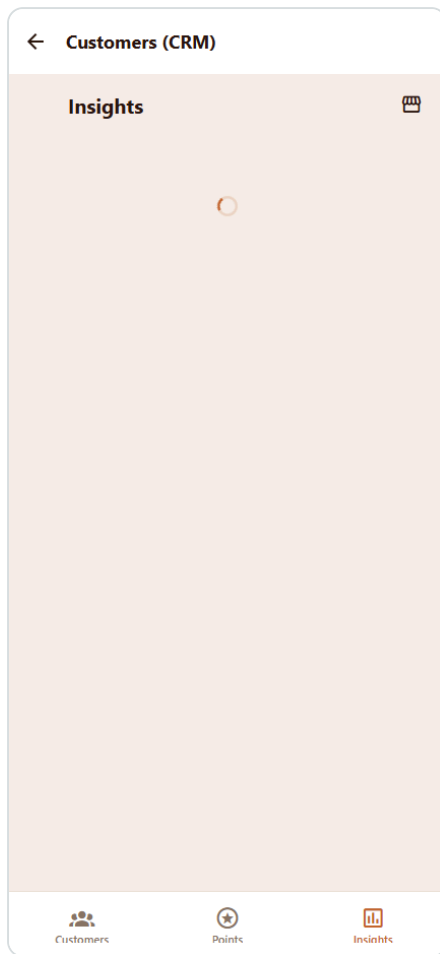

FEATURES ON THIS SCREEN

- Issue New gift card action
- Per-card: code, status, remaining vs. original balance, purchase/expiry dates
- Redeem action with a confirmation dialog showing the exact amount before applying

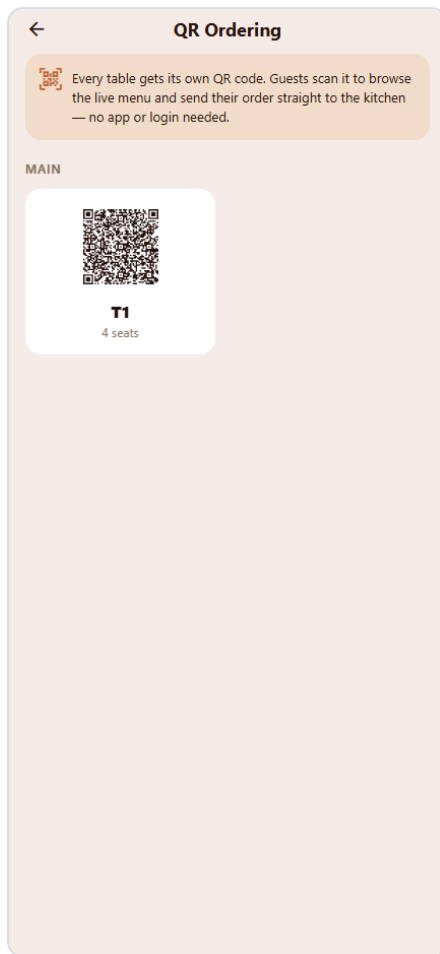

FEATURES ON THIS SCREEN

- Total loyalty members and active points pool, platform-live
- Full member directory with visits, points, and tier
- Active points pool breakdown: total members, all-time redeemed
- Reward catalog: Free Latte, Pastry Box, 10% Off Order, Buy 1 Get 1 (each with a points cost)
- Most recently active members list

**FEATURES ON THIS SCREEN**

- Retention rate and average lifetime value, computed from real order data
- Customer Growth chart — new vs. returning, last 7 days
- Coupon redemption trends
- Customer segments: Frequent Visitors, New Customers, At Risk — each with count and average spend

QR Ordering (staff view)

FEATURES ON THIS SCREEN

- One QR code generated per table, grouped by zone
- Explanation copy for staff on how customer self-ordering works

FEATURES ON THIS SCREEN

- No login/app required — opens straight from the scanned QR code
- Optional guest name field
- "Best Sellers" strip — always at least 5 items, ranked by real recent sales with a Popular-flag/available-item fallback
- Full menu grouped by category
- Add/quantity stepper per item, shared cart between the Best Sellers strip and the main list
- Live cart bar with item count and total (tax included)
- Order confirmation screen with order number and total after placing

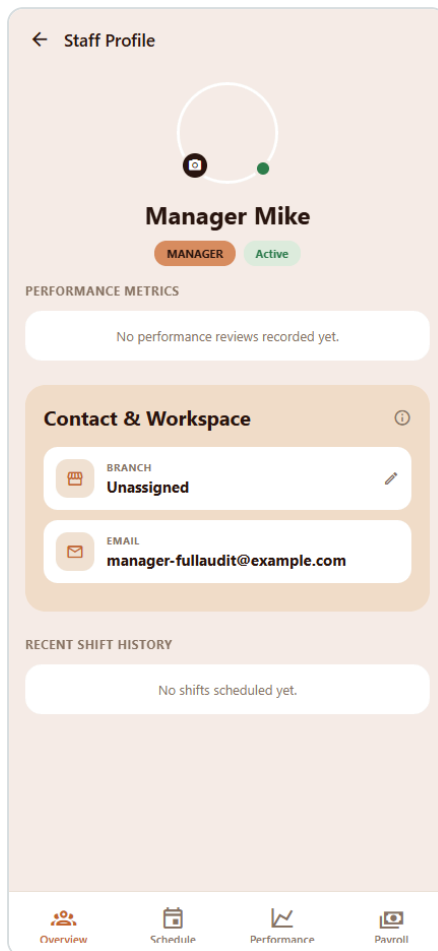

Team Portal — Overview

FEATURES ON THIS SCREEN

- Active staff count and on-leave count
- Filter: All / Active / On Leave / Suspended
- Staff directory with role and status per person
- Add staff member action

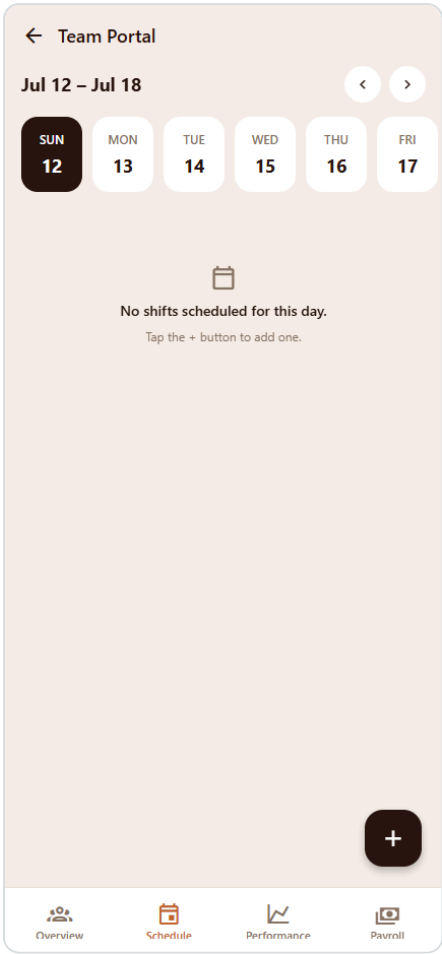

Team Portal — Staff Profile

FEATURES ON THIS SCREEN

- Editable profile photo
- Role badge and active/inactive status
- Performance metrics section (attendance, orders handled, revenue generated)
- Contact & Workspace: branch assignment, email, phone, hourly rate
- Recent shift history

Team Portal — Schedule

FEATURES ON THIS SCREEN

- Week-view calendar strip (date navigation)
- Per-day shift list
- Add Shift action — pick staff member, date, start/end time, notes

Team Portal — Performance Reports

Performance Reports

No performance reviews recorded yet.

Reviews will show up here once staff have been evaluated.

FEATURES ON THIS SCREEN

- Ranked leaderboard across all staff, rolled up from individual reviews
- Correct empty state when no reviews have been recorded yet

✓ Save Recipe

FEATURES ON THIS SCREEN

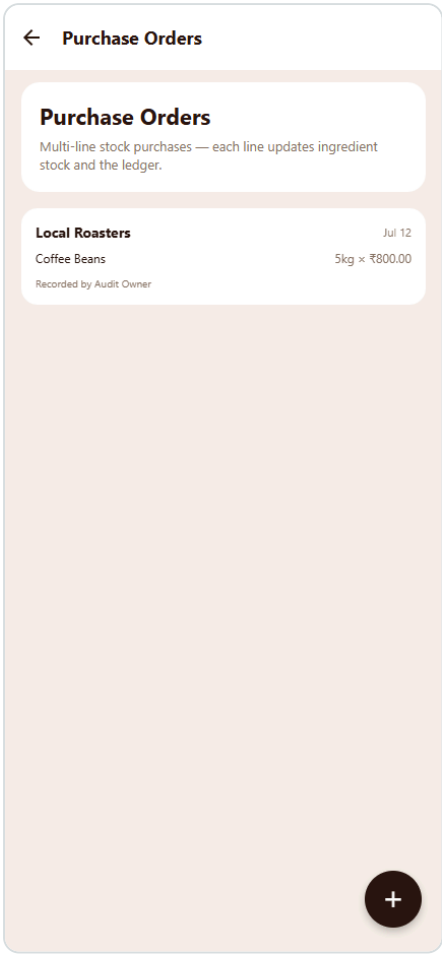

- Product type toggle: Prepared (uses a recipe) vs. Independent (sells from its own stock)
- Add any number of ingredient lines, each with its own quantity and unit
- Unit conversion handled automatically against the ingredient's stored stock unit
- Saving drives real inventory deduction on every future sale of this item

FEATURES ON THIS SCREEN

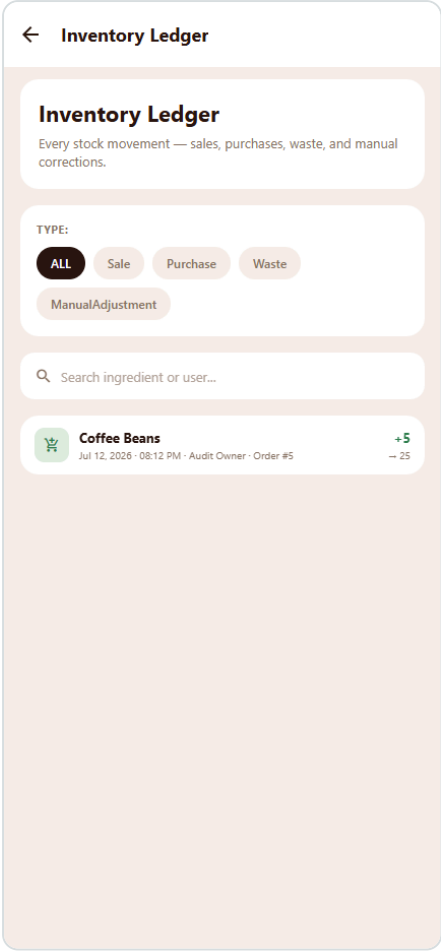

- Total active SKU count and low-stock alert count
- Search inventory
- Per-ingredient: current stock vs. target, last restock time, edit/delete/restock actions
- Add Item action

Inventory — Purchase Orders

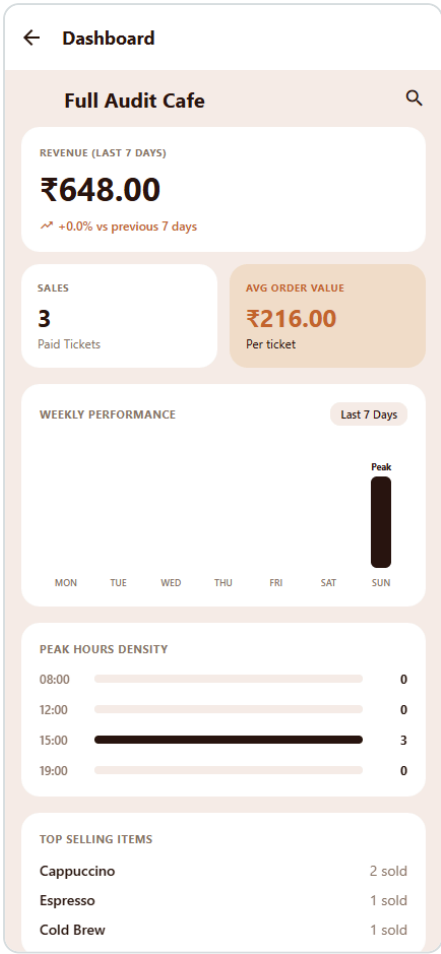

FEATURES ON THIS SCREEN

- Multi-line stock purchases — each line updates ingredient stock and the ledger together
- Per-PO: supplier, date, line items with quantity and cost, who recorded it
- Add new purchase order

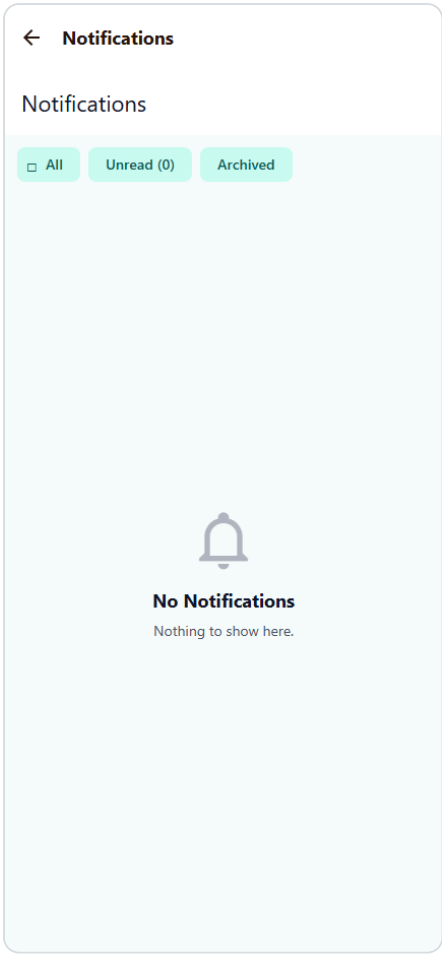

FEATURES ON THIS SCREEN

- Every stock movement in one place: sales, purchases, waste, manual corrections
- Filter by type: All / Sale / Purchase / Waste / Manual Adjustment
- Search by ingredient or user
- Per-entry: ingredient, change amount, resulting stock, who/what/when, and a reference (e.g. the order or PO it came from)

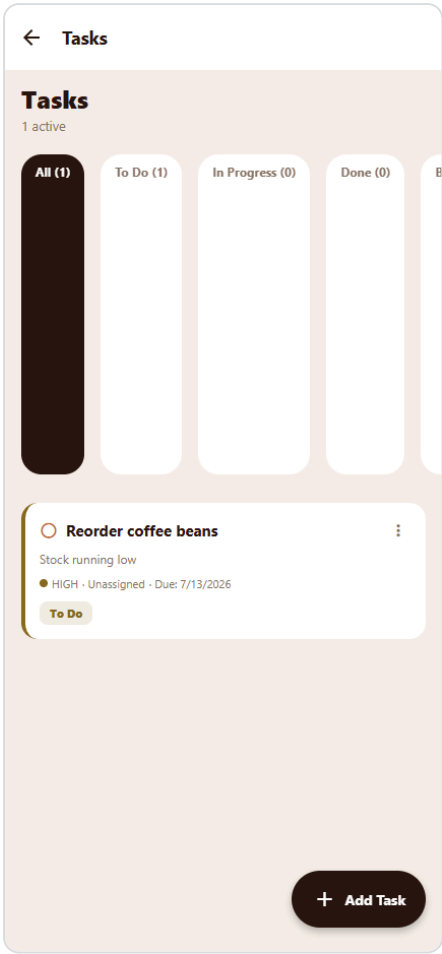

FEATURES ON THIS SCREEN

- Revenue (last 7 days) with trend vs. previous period
- Sales count and average order value
- Weekly performance chart with a highlighted peak day
- Peak hours density breakdown
- Top-selling items list
- Export to PDF / Export to Excel

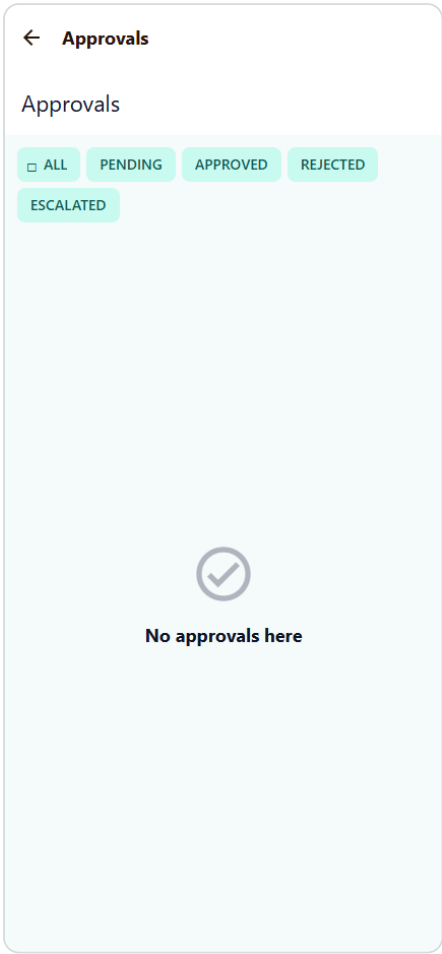

FEATURES ON THIS SCREEN

- Real, event-driven notification feed (low stock, new orders, approvals, etc.)

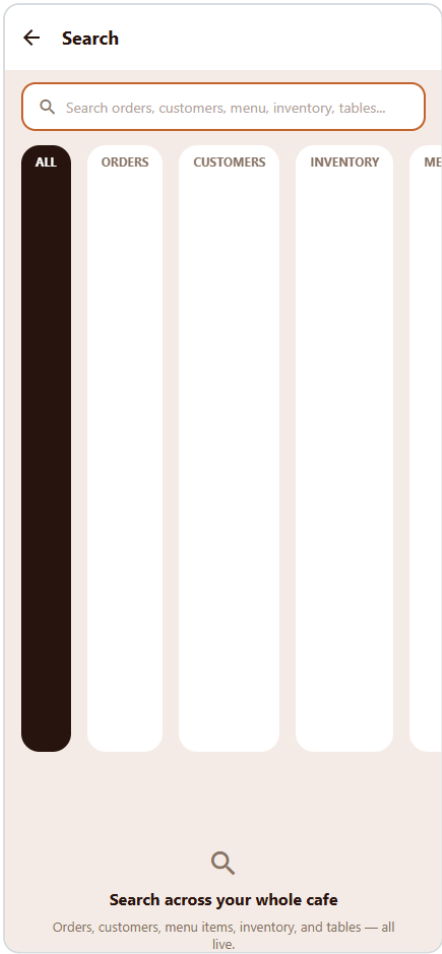

FEATURES ON THIS SCREEN

- Task list with title, description, priority, due date
- Add/complete tasks

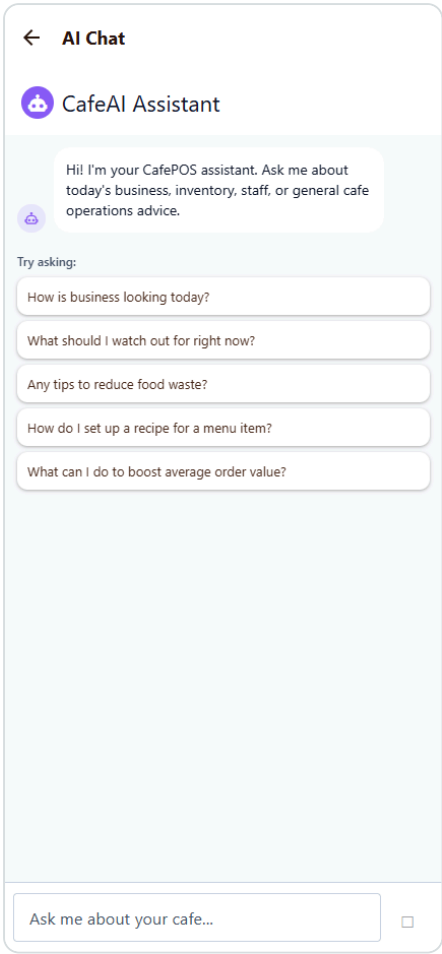

FEATURES ON THIS SCREEN

- Pending approval requests (e.g. large discounts) routed to a manager/owner
- Approve/deny actions

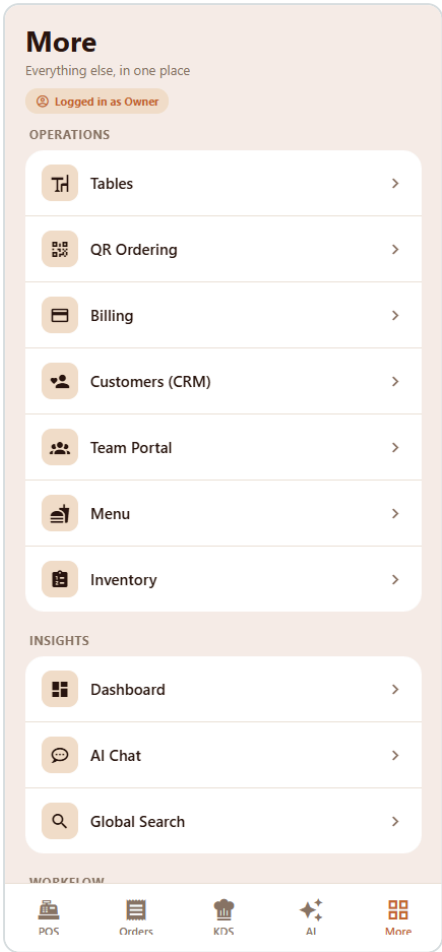

FEATURES ON THIS SCREEN

- Single search box across Orders, Customers, Inventory, Menu, and Tables
- Filter tabs to narrow results by type

FEATURES ON THIS SCREEN

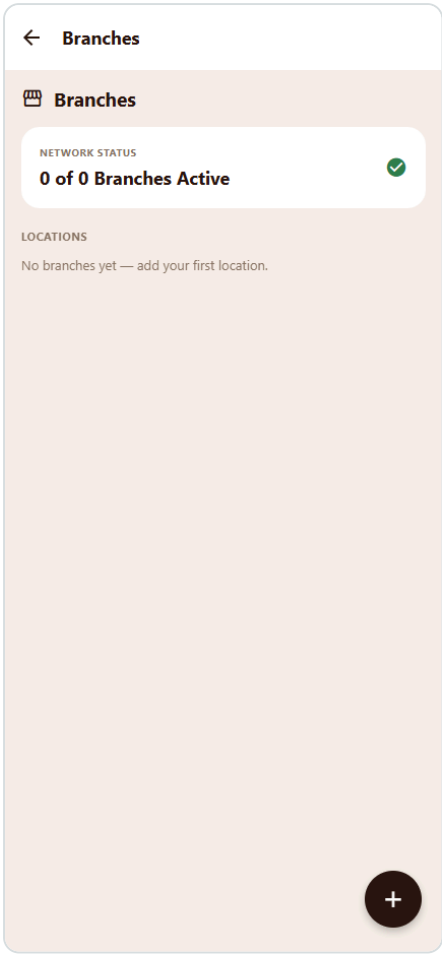

- Conversational assistant grounded in this cafe's real, current data (revenue, low stock, staff count)
- Suggested prompts: business check-in, risk flags, food-waste tips, recipe setup help, AOV tips

FEATURES ON THIS SCREEN

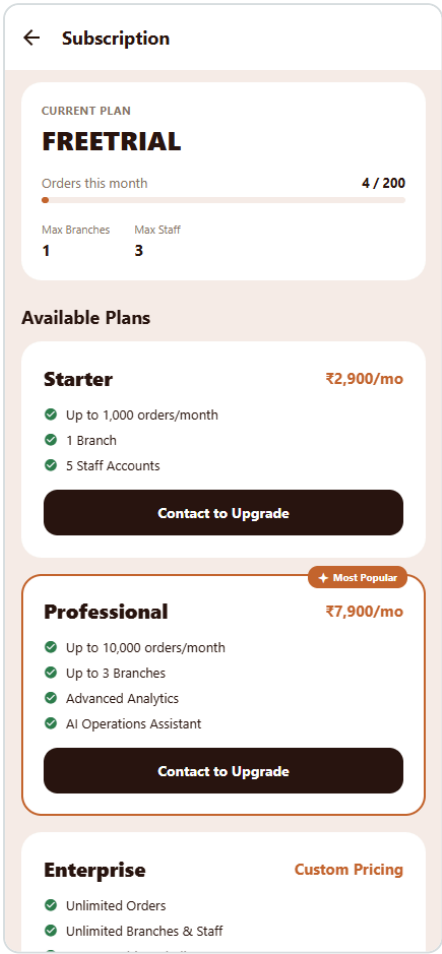

- Plan-gated — only visible/usable on qualifying subscription tiers
- Third-party connection hub (payment gateways, delivery platforms, etc.)

Branches

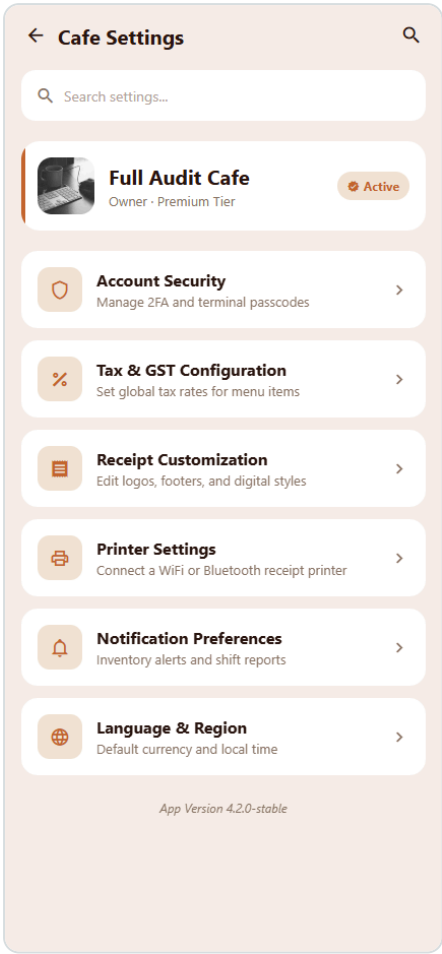

FEATURES ON THIS SCREEN

- Multi-location management for cafes with more than one outlet
- Correct empty state for a single-location cafe

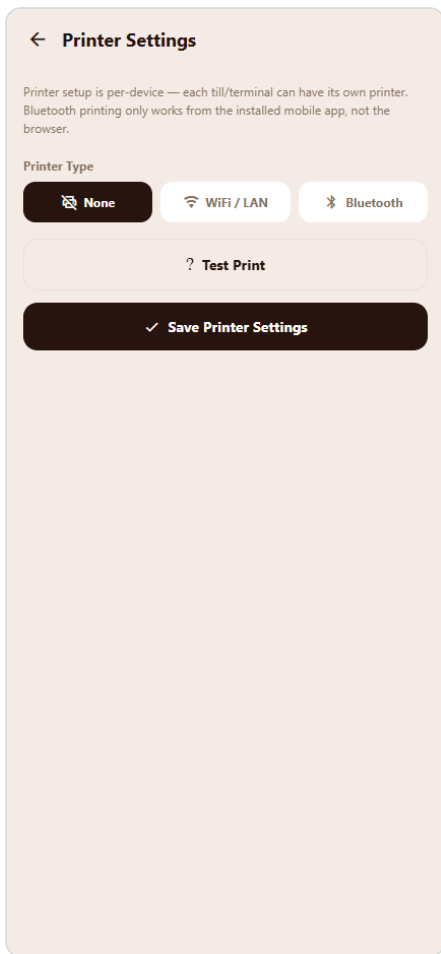

FEATURES ON THIS SCREEN

- Current plan, tier, and status
- Plan change takes effect on the very next request — no delay

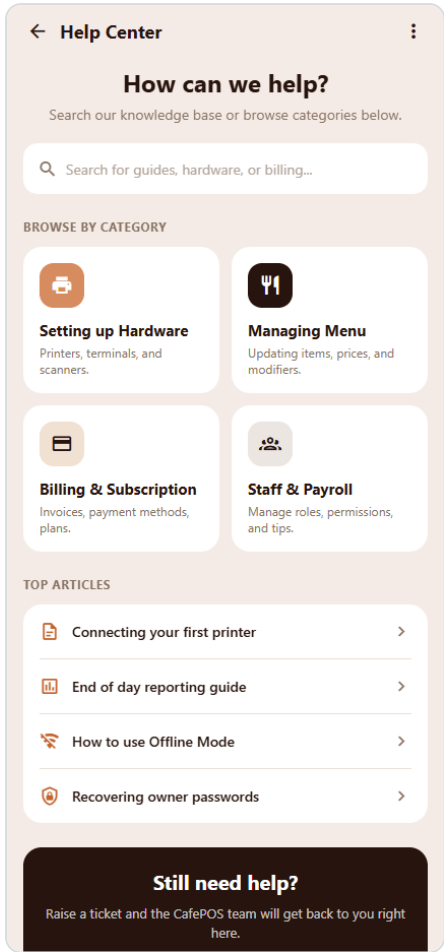

FEATURES ON THIS SCREEN

- Business profile (name, logo) and plan/status summary
- Account Security (2FA, terminal passcode)
- Tax & GST Configuration
- Receipt Customization (logo, footer, digital styling)
- Printer Settings
- Notification Preferences
- Language & Region

FEATURES ON THIS SCREEN

- Printer type: None / WiFi (LAN) / Bluetooth
- Test Print action
- Notes the Bluetooth-only-works-from-the-installed-app limitation on web

FEATURES ON THIS SCREEN

- Browse-by-topic categories (Hardware, Menu, Billing, Staff)
- Top help articles list
- Raise a Ticket action, with existing tickets shown inline

HARDWARE > PRINTING

Connecting your Receipt Printer

Last updated 2 days ago

5 min read

Setting up your receipt printer is a crucial step to ensuring your CafePOS system runs smoothly. This guide covers the physical connection and the software pairing process for standard Bluetooth and Ethernet thermal printers.

1. Physical Installation

1

Connect the power cable to the back of the printer and a wall outlet.

2

Insert the paper roll with the edge feeding from the bottom.

2. Pairing with CafePOS

⚙️

Open App Settings

Tap on the menu icon and navigate to 'Hardware' > 'Printers'.

🔍

Scan for Devices

Ensure Bluetooth is enabled on your tablet. Tap 'Add New Printer' to begin searching.

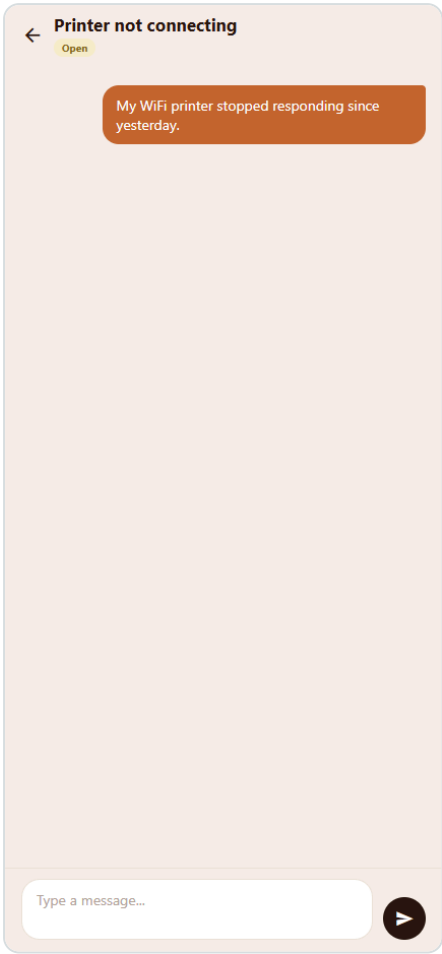

🌟

Pro Tip: Most Star Micronics printers use '1234' as the default PIN.

FEATURES ON THIS SCREEN

- Full step-by-step article content with last-updated date and read time

Support Ticket — Detail

FEATURES ON THIS SCREEN

- Full message thread for one ticket, with open/resolved status
- Reply box to continue the conversation with the CafePOS team
