

# CafePOS

WARM PRECISION · FEATURE GUIDE

## Every Screen, What It Does

A complete walkthrough of the app's navigation — every page, who can see it, and which plan unlocks it.

## § Contents

|                                  |                                |
|----------------------------------|--------------------------------|
| 1. Bottom Tabs (Main Navigation) | POS • Orders • KDS • AI • More |
| 2. More Menu — Operations        | 7 screens                      |
| 3. More Menu — Insights          | 3 screens                      |
| 4. More Menu — Workflow          | 3 screens                      |
| 5. More Menu — Business          | 3 screens                      |
| 6. More Menu — Account           | 3 screens                      |
| 7. Billing (detail flow)         | 4 screens                      |
| 8. Customers / CRM (sub-tabs)    | 8 screens                      |
| 9. Team Portal (sub-tabs)        | 6 screens                      |
| 10. Super Admin (sub-tabs)       | 4 screens                      |
| 11. Onboarding Wizard            | 4 steps                        |
| 12. Login & Splash               | 2 screens                      |

**How to read the badges:** each screen shows which **Plan** tier unlocks it (Normal / Plus / Premium) and, where relevant, which **staff role** can open it. A screen only appears to a user when both conditions are satisfied.

# 1 Bottom Tabs — Main Navigation

The 5 tabs every logged-in user sees at the bottom of the screen.

|                                                                                                                                                                                                                                                                             |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| <b>POS (Checkout)</b><br>route: POS<br><br>The main billing screen. Browse the menu by category, build a cart, choose Dine In / Takeaway / Delivery, assign a table, enter guest name & mobile number, split the bill, apply a discount, and fire the order to the kitchen. | NORMAL |
| <b>Orders (Tables)</b><br>route: Orders<br><br>Live floor plan — tables grouped by zone with occupancy status, current bill, and order progress. Tap a table to open its check or mark it paid.                                                                             | NORMAL |
| <b>KDS (Kitchen Display)</b><br>route: KDS<br><br>Kitchen-facing board with orders in New / Preparing / Ready columns, live elapsed timers, and a button to advance each order to its next stage.                                                                           | NORMAL |
| <b>AI (Assistant Home)</b><br>route: AI<br><br>AI operations hub — 7-day sales forecast chart, stock-depletion risk warnings, and smart suggestions for the cafe.                                                                                                           | PLUS   |
| <b>More</b><br>route: More<br><br>Hub linking to every other screen in the app, grouped into sections. The list shown here adjusts live based on the logged-in user's role and the cafe's subscription plan.                                                                | NORMAL |

## 2 More Menu — Operations

---

Day-to-day running of the cafe floor.

### Tables

route: Tables

NORMAL

Same floor-plan screen as the Orders tab — manage tables and zones, view occupancy, add new tables, open or pay a table's check.

### QR Ordering

route: QRMenu

NORMAL

Generates a real, scannable QR code per table (grouped by zone). Guests scan it on their own phone to browse the live menu and place an order directly to the kitchen — no app or login needed. Includes Share Link for printing.

### Billing

route: Billing (opens a 4-screen flow — see §7)

NORMAL

OWNER/MANAGER

Today's revenue, transaction count, and a list of recent transactions.

### Customers (CRM)

route: CRM (opens a tabbed CRM suite — see §8)

PLUS

OWNER/MANAGER

Entry point into the full Customer Relationship Management suite — directory, campaigns, loyalty points, and insights.

### Team Portal

route: TeamPortal (opens a tabbed staff suite — see §9)

PLUS

OWNER/MANAGER

Entry point into staff management — roster, schedule, performance, and payroll.

### Menu

route: Menu

NORMAL

OWNER/MANAGER

Browse and search menu items by category, edit prices, toggle item availability on/off, and add new menu items.

### Inventory

route: Inventory

PLUS

OWNER/MANAGER

Stock levels vs. capacity for every ingredient, restock action, add new inventory items, search.

### 3 More Menu — Insights

---

Analytics and search.

Dashboard

route: Dashboard

Revenue analytics — weekly performance chart with trend %, peak-hours density, top-selling items, export report to PDF/Excel.

PLUS

OWNER/MANAGER

AI Chat

route: AIChat

Conversational AI assistant — ask about sales, staff, forecasts, or waste, with quick-prompt buttons for common questions.

PLUS

Global Search

route: Search

One search box across Orders, Customers, Inventory, Menu, and Tables, with category filter chips.

NORMAL

## 4 More Menu — Workflow

---

Internal task and approval tracking.

|                                                                                                                                                                                                                                                  |                                                    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|
| <div><div>Notifications</div><div>route: Notifications</div><div>Categorized feed (order / inventory / billing / staff / system / marketing / AI). Mark read, archive, delete, or retry a failed notification.</div></div>                       | <div>NORMAL</div>                                  |
| <div><div>Approvals</div><div>route: Approvals</div><div>Pending requests that need sign-off — refunds, discounts, expenses, salary changes, inventory adjustments, stock transfers, leave. Approve, reject, or escalate with notes.</div></div> | <div><div>PLUS</div><div>OWNER/MANAGER</div></div> |
| <div><div>Tasks</div><div>route: Tasks</div><div>Task board with priority, status, and due date. Create, assign to staff, update status, or delete a task.</div></div>                                                                           | <div><div>PLUS</div><div>OWNER/MANAGER</div></div> |

## 5 More Menu — Business

---

Multi-location and account-level management.

### Integrations

route: Integrations

PREMIUM

OWNER/MANAGER

Browse delivery & payment integrations (UberEats, DoorDash, Deliveroo, Menulog, Stripe, ...), connect or disconnect each. **Launches later** alongside the Premium tier.

### Branches

route: Branches

PLUS

OWNER/MANAGER

List of branch locations with active/inactive status. Add a new branch or deactivate an existing one.

### Subscription

route: SaaS

NORMAL

OWNER/MANAGER

Current plan usage bar, side-by-side comparison of Normal/Plus/Premium plans, apply a coupon and change plan.

## 6 More Menu — Account

---

Platform administration and settings.

### Super Admin

route: SuperAdmin (opens a tabbed platform-admin suite — see §10)

NORMAL

OWNER ONLY

Entry point into platform-level administration — visible only to the Owner role, regardless of plan.

### Cafe Settings

route: Profile

NORMAL

OWNER/MANAGER

Settings hub — account security (2FA, passcode), tax/GST configuration, receipt customization, notification preferences, language & region, logout. Links through to Cafe Profile (logo, name, weekly hours).

### Help Center

route: Help

NORMAL

Searchable knowledge base — category tiles (hardware, menu, billing, staff) and a top-articles list. Tap an article to read step-by-step instructions.

## 7 Billing — Detail Flow

---

Opened from More → Billing.

### **Billing** BillingMain

Today's revenue + transaction count, list of recent transactions; tap one to open its invoice.

### **Invoice** Invoice

Itemized GST invoice/receipt — line items, coupon applied, tax breakdown, payment method.

### **Refund** Refund

Enter a refund amount and reason, choose the refund method (original payment / cash / wallet), submit.

### **Daily Closing** DailyClosing

End-of-day report — net sales, order count, discounts, refunds, and cash-drawer reconciliation.

## 8 Customers / CRM — Sub-tabs

---

Opened from More → Customers (CRM). Has its own 4-tab bar.

### CUSTOMERS TAB

#### Customer Directory CustomerDirectory

Searchable member list with loyalty tier badges (Bronze–Platinum); add a new customer.

#### Customer Profile CustomerProfile

Opened from a directory row — tier progress bar, points balance, top favorite item, edit name/notes.

#### Coupons Coupons

That customer's active/used coupons; redeem one straight onto the current bill.

#### Gift Cards GiftCards

That customer's gift cards with balance bars; issue a new card or redeem balance.

#### Order History OrderHistory

That customer's past visits — items ordered, totals, points earned per visit.

#### Favourites Favourites

That customer's most-ordered items, ranked with medal icons.

### OTHER CRM TABS

#### Campaigns Campaigns

Active/draft marketing campaigns with reach and conversion stats, plus an AI campaign recommendation.

#### Points Points

Total loyalty points pool, reward catalog, and recently active members.

#### Insights Insights

Retention rate & lifetime-value KPIs, new-vs-returning chart, reward redemption chart, customer segments.

## 9 Team Portal — Sub-tabs

---

Opened from More → Team Portal. Has its own 4-tab bar.

### **Team Overview** TeamOverview

Searchable staff roster with a live clock-in status dot, filter chips, and performance score per person.

### **Staff Profile** StaffProfile

Opened from a roster row — attendance/performance metrics, recent shifts, edit/message/schedule quick actions.

### **Team Schedule** TeamSchedule

Weekly shift calendar with a day picker and an AI shift-optimization suggestion banner.

### **Edit Shift** EditShift

Opened from a schedule tap — assign staff member, role, date, and a recurring-shift toggle.

### **Performance** Performance

Team KPIs (efficiency, sales/hour, ticket size, labor cost %), a staff leaderboard, and a tip-split chart.

### **Payroll** Payroll

Total labor cost for the current pay period, with a per-staff hourly-rate/hours/pay breakdown.

## 10 Super Admin — Sub-tabs

---

Opened from More → Super Admin. **Owner role only**. Has its own 4-tab bar.

### Overview Overview

Platform-wide "ecosystem pulse" — revenue trend chart and recent tenant signups.

### Tenants Tenants

Searchable list of every tenant cafe account, with branch count, plan, and status.

### Feature Flags Flags

Toggle feature flags on/off with a rollout-percentage slider per flag.

### Audit Log AuditLogs

Searchable, severity-filterable log of every action taken on the account.

## 11 Onboarding Wizard

---

Runs once, right after a new account signs up, before the main app appears.

### Step 1 — Welcome

Name your cafe and upload a logo.

### Step 2 — Cafe Type

Pick a cafe type (Coffee Shop / Bakery / Restaurant / Bar) and which service modes you offer (Dine In / Takeaway / Delivery / QR).

### Step 3 — Build Menu

Choose how to set up your menu: AI-generated starter menu, import from CSV/Square, or start from scratch.

### Step 4 — Build Crew

Invite staff by email/phone with a role, then finish setup — creates real staff records and unlocks the main app.

## 12 Login & Splash

---

Shown before a user is signed in.

### Splash

Branded loading screen that silently restores a saved session, then routes to Login or straight into the app.

### Login

Email/password sign-in with an Owner/Manager/Waiter role picker (auto-fills matching demo credentials) and a "stay logged in" toggle.

**Note:** two screens exist in the codebase but are not currently wired into any menu — a Recipe Builder (ingredient cost breakdown) and a standalone Staff List. They're not included above since they aren't reachable in the app today.
