

PrabandhOS

CAFE & RESTAURANT POS

Poori Setup & Chalane Ki Guide

Login se lekar bill banane tak — bilkul aasan Hinglish me

Ye guide kiske liye hai?

Har us cafe owner, manager ya staff ke liye jo PrabandhOS pehli baar chala raha hai. Koi technical knowledge ki zaroorat nahi — bas step-by-step follow karte jaiye.

Isme kya milega?

Account banana → Login → Cafe setup → Menu banana (photo se bhi) → Order lena (POS) → KOT kitchen bhejna → Token orders → Bill settle karna → Billing page → Common problems ka solution.

Index — Kya-Kya Hai Is Guide Me

1. Shuru Karne Se Pehle

Kya-kya chahiye, app kaise kholein

2. Naya Account Banana (Create Your Cafe)

Form bharna + OTP verify karna

3. Login Karna

Roz kaise andar aayenge, password bhool jaayein to kya karein

4. Pehli Baar Ka Setup — Onboarding Ke 4 Steps

Cafe naam, logo, style, menu, team

5. Menu Banana — Saare 4 Tarike

Starter menu, CSV, Photo, Manually

6. Photo Se Menu Upload — Zaroori Cross-Check

Sabse important chapter — dhyan se padhein

7. Menu Item Edit Karna (Pencil Button)

Galat naam/price theek karna, item hatana

8. Order Lena — POS Screen

Dine In, Token, Takeaway, Delivery, Cash Sale

9. KOT — Kitchen Ko Order Bhejna

KOT & Print, KDS screen, stations

10. Token Orders (Counter/QSR Style)

Token number, Add Item, Print KOT

11. Bill Banana & Settle Karna

Cash / UPI / Card, split payment, discount, print

12. Billing Page — Purane Bills Dekhna

Transactions, receipt, WhatsApp par bhejna

13. Common Problems Aur Unka Solution

Error aaye to sabse pehle yahan dekhein

14. Madad Chahiye? Hamari Team Se Baat Karein

Contact details

1 Shuru Karne Se Pehle

2 minute ka kaam hai. Bas ye cheezein saamne rakh lijiye.

► Aapko kya chahiye

- **Internet connection** — WiFi ya mobile data, chalu hona chahiye.
- **Ek email ID** — jo aap regularly kholte hain (OTP isi par aayega).
- **Ek mobile number** — 10 digit ka, bina +91 ke.
- **Laptop/PC ya tablet** — Chrome ya Edge browser me app best chalta hai. Mobile phone par bhi chalega, lekin bade screen par kaam aasan rehta hai.
- **Apne cafe ka menu** — printed card, photo, ya Excel/CSV file — jo bhi ho.
- **Cafe ka logo** (optional) — bill par chhapega.

► App kaise kholein

- 1 Apne laptop/mobile me **Chrome** ya **Edge** browser kholein.
- 2 Address bar me PrabandhOS ka link type karein — ye link hamari team ne aapko WhatsApp ya email par bheja hoga.
(Link na mila ho to **7689813155** par WhatsApp kar dijiye, turant bhej denge.)
- 3 Enter dabaiye. Kuch second me **PrabandhOS** ka login page khul jaayega.

💡 **Pro Tip** — Link ko bookmark kar lijiye Page khulne ke baad keyboard par **Ctrl + D** dabaiye. Ab har baar link type nahi karna padega. Mobile par: browser menu → "Add to Home screen" — app jaisa icon ban jaayega.

📌 Yaad rakhein Pehli baar page thoda dheere khul sakta hai (5–20 second). Ye normal hai — server "jaag" raha hota hai. Doosri baar se fast chalega. Bar-bar refresh mat kijiye.

2 Naya Account Banana — "Create Your Cafe"

Ye sirf **ek hi baar** karna hai — jab aap bilkul naye hain. Agar account pehle se bana hai to seedhe **Part 3 (Login)** par jaaiye.

► Step-by-step

- 1 Login page ke **sabse neeche** dekhein — likha hoga "New cafe? **Create your account**". Us par click karein.
- 2 **Create Your Cafe** form khul jaayega. Ab ye 5 cheezein bharni hain:

CREATE YOUR CAFE

Cafe Name	Aapke cafe ka naam — jaise <i>Aroma Loft</i> . Yahi bill par chhapega.
Your Name	Aapka apna naam — jaise <i>Priya Sharma</i> .
Email	Aapki email ID — <i>you@example.com</i> . OTP isi par aayega.
Mobile Number	10 digit ka number, bina +91 aur bina space.
Password	Kam se kam 6 characters . Aisa rakhein jo yaad rahe.

- 3 **Send Verification Code** button dabaiye.
- 4 Apna **email inbox** kholein. 6 digit ka code aaya hoga (jaise **123456**). Inbox me na mile to **Spam / Promotions** folder zaroor check karein.
- 5 Wo 6 digit ka code app me **Verification Code** wale box me daaliye.
- 6 Ab **Create Cafe** dabaiye. Bas! Aapka cafe ban gaya.

⚠ **Dhyan Dein — Password kahin likh lijiye** Jo password aapne banaya hai, use kahin safe jagah note kar lijiye. Ye password aur email hi aapki **Owner** wali chaabi hai — isse hi aap roz login karenge.

► Yahan aksar kya galat hota hai

Problem	Kya karein
OTP email nahi aaya	2 minute rukiye. Spam folder dekhein. Phir bhi na aaye to email spelling check karein aur Send Verification Code dobara dabaiye.
"Invalid code" aa raha hai	Code purana ho gaya hoga. Naya code mangwaiye aur sabse latest email wala code hi daaliye.
Email pehle se registered hai	Iska matlab account already bana hua hai. Login page par jaakar Forgot Access? se password reset kar lijiye.
Mobile number accept nahi ho raha	Sirf 10 digit daaliye — +91, 0, space ya dash mat lagaiye.

3 Login Karna

Ye aap roz karenge — 10 second ka kaam.

WELCOME BACK

Securely access your branch dashboard

Work Email	Wahi email jo account banate waqt daali thi
Security Key	Aapka password (yahi "Security Key" hai — koi alag cheez nahi)

- 1 **Work Email** box me apni email daaliye.
- 2 **Security Key** box me apna password daaliye. Password sahi type hua ya nahi dekhna ho to box ke andar **aankh wale icon** par click karein.
- 3 Login button dabaiye. Aap seedhe apne **Dashboard / POS** par pahunch jaayenge.

► Password bhool gaye?

- 1 Login page par "Security Key" ke bagal me **Forgot Access?** likha hai — us par click karein.
- 2 Apni email daaliye aur code mangwaiye.
- 3 Email par aaya code daal kar naya password set kar lijiye.

 **Staff ke liye** Aapke waiter/cashier/kitchen staff ka login **alag** hota hai. Unka email/phone aur password aap khud banate hain — Part 4 ke Step 4 (Build your crew) me, ya baad me **More → Team Portal → Staff Access** se. Owner apna password kabhi kisi ko na de.

 Role ke hisaab se screen alag dikhti hai Owner/Manager ko sab kuch dikhta hai. Waiter ko sirf POS/Orders, aur kitchen staff ko sirf KDS. Isliye agar kisi staff ko koi button nahi dikh raha, to wo "error" nahi hai — unke role me wo permission nahi hai. Aap **More → Team Portal → Staff Access** se badal sakte hain.

4 Pehli Baar Ka Setup — Onboarding Ke 4 Steps

Account banne ke baad app khud aapko 4 chhote steps se guzarega. Har step ke neeche **Continue** button hota hai, aur upar **Back** — kabhi bhi peeche jaa sakte hain.

► Step 1 — "Welcome Home." (Cafe ka naam & logo)

- **What's the name of your cafe?** — cafe ka naam likhiye (jaise *The Golden Bean*).
- **Upload your logo** — box par click karke apne logo ki image chun lijiye. Logo na ho to skip kar dijiye, baad me **More** → **Cafe Settings** se daal sakte hain.

► Step 2 — "What's your style?" (Cafe ka type & serving)

- Apne cafe ka type chuniye — Cafe, Restaurant, QSR, Bakery, jo bhi aap ho.
- **How do you serve customers?** — yahan wo sab chuniye jo aap actually karte hain: Dine In, Takeaway, Delivery, Token/Counter.
Ye important hai — jo yahan choose karenge, wahi options aapko POS screen par dikhenge. Baad me badalna ho to **More** → **Cafe Settings** → **Order Types** se ho jaayega.

► Step 3 — "Build Your Menu"

Yahan 4 options milte hain. Poora detail agle Part 5 me hai — abhi bas itna samajh lijiye ki koi bhi chun lein, menu baad me kabhi bhi badla ja sakta hai.

► Step 4 — "Build your crew" (Team add karna)

Aapka apna account upar **ADMIN** badge ke saath dikhega. Ab staff jodiye:

- 1 **Email or Phone** — staff ka email ya mobile (jaise *barista@cafe.com*).
- 2 **Role** — dropdown se chuniye: Manager, Cashier, Waiter, Chef, wagairah.
- 3 **App Login Password** — unka password banaiye (kam se kam 6 characters). Ye password unhe bata dijiye.
- 4 **Screen Access** — **Automatic** chun lijiye (role ke hisaab se screens apne aap set ho jaayengi). **Custom** tabhi chuniye jab aap khud ek-ek screen tick karna chahte hain.
- 5 **Add Team Member** dabaiye. Aise hi baaki staff bhi jod lijiye.

💡 **Jaldi me hain?** Staff abhi skip kar dijiye — **Continue** dabaiye. Baad me kabhi bhi **More** → **Team Portal** → **Staff Access** se add kar sakte hain. Setup rukna nahi chahiye.

Chaaron step ke baad app aapko seedhe **Menu** screen par le aayega — taaki aap apna menu dekh/theek kar sakein.

5 Menu Banana — Saare 4 Tarike

Menu POS ka dil hai. Jab tak menu me items nahi honge, order nahi ban paayega. Chaar tarike hain — apne hisaab se koi bhi chuniye.

Tarika	Kab use karein	Kitna time
Use a starter menu	Aapko bas jaldi shuru karna hai, items baad me theek karenge	10 second
Import from CSV	Aapka menu already Excel/Google Sheet me hai	2 minute
Import from a photo	Sirf printed menu card hai, typing nahi karni	1 minute + checking
Start from scratch	Items kam hain, aap khud type karna chahte hain	Item ke hisaab se

► Tarika 1 — Use a starter menu

Ek ready-made cafe menu turant chadh jaata hai — Espresso, Cappuccino, Latte, Cold Brew, Croissant, Muffin, Sandwich jaise **11 aam items**, categories aur price ke saath.

- 1 "Use a starter menu" card par click karein (border orange ho jaayega = select ho gaya).
- 2 **Continue** dabaiye. Items add ho jaayenge.
- 3 Baad me Menu screen par jaakar apne hisaab se naam/price badal lijiye, jo nahi chahiye wo delete kar dijiye.

► Tarika 2 — Import from CSV (Excel se)

Agar aapka menu Excel ya Google Sheets me hai, to use CSV bana kar seedha upload kar dijiye.

File me columns kya hone chahiye

Column	Zaroori?	Example
name	Haan	Cappuccino
price	Haan	130
category	Nahi	Espresso
subtitle	Nahi	Espresso, steamed milk & foam
description	Nahi	Classic Italian favourite
veg	Nahi	Veg / NonVeg / Jain / Eggetarian

- 1 Excel me file kholein → **File** → **Save As** → **CSV (Comma delimited)**.
- 2 App me "Import from CSV" card par click karein.
- 3 **Choose CSV file** dabaiye aur apni file chun lijiye.
- 4 Neeche **preview** aayega — kitne items ready hain wo dikhega. Kisi row par click karke naam/price theek kar sakte hain, ya ✕ se hata sakte hain.
- 5 **Continue** dabaiye.

⚠ CSV ki 2 sabse aam galtiyan

- **Price me ₹ ya text** — sirf number likhiye. ₹130 ✕ 130 ✓
- **Khaali naam ya 0 price** — aisi rows apne aap skip ho jaati hain. Isliye upload ke baad app batata hai "Skipped X rows" — ghabraiye mat, bas un rows ko theek karke dobara upload kar dijiye ya haath se add kar lijiye.

► **Tarika 3 — Import from a photo**

Apne printed menu ki photo daaliye, app khud items, category aur price padh kar bhar deta hai. **Ye sabse tez tarika hai, lekin isme cross-check karna zaroori hai** — poora detail agle Part 6 me hai. Wo part zaroor padhiye.

► **Tarika 4 — Start from scratch (khud add karna)**

- 1 Menu screen par upar-daayein + button dabaiye — **Add Menu Item** form khulega.
- 2 **Name** — item ka naam (jaise *Caramel Macchiato*).
- 3 **Photo (optional)** — "Tap to add a photo" par click karke item ki tasveer lagaiye.
- 4 **Category** — Espresso, Food, Pastries... (nayi category bhi bana sakte hain).
- 5 **Price** — sirf number (jaise 130).
- 6 **Subtitle / Description** — optional, guest ko dikhta hai.

- 7 **Kitchen Station** — ye item kis station par banega (Coffee Bar, Kitchen...). Isse hi KOT sahi station par jaata hai.
- 8 Zaroorat ho to **Add Variant** (Half/Full, Small/Large) aur **Add Option / Topping Group** (Extra Cheese, Spice Level) bhi jod dijiye.
- 9 Save dabaiye. Item menu me aa gaya.

6 ⚠ Photo Se Menu Upload — Zaroori Cross-Check

● Sabse Important Baat — Ise Skip Mat Kijiye

Photo se menu upload karna bahut aasan hai, **lekin ye 100% sahi nahi hota**. Photo padhne wali technology (OCR/AI) kabhi-kabhi **galti karti hai** — naam adhoora padh leti hai, price ulta-seedha kar deti hai, ya do items ko mila deti hai.

Isliye upload ke baad har item ko apni aankh se check karna zaroori hai. Galat price ka matlab hai galat bill — aur galat bill ka matlab hai customer ke saamne sharmindagi aur paise ka nuksaan. 2 minute ka checking aapko baad ki badi headache se bacha lega.

▶ Photo se upload kaise karein

- 1 Onboarding me "**Import from a photo**" card par click karein.
Ya baad me: **More** → **Menu** kholein aur upar wale banner "**Import your menu from a photo**" par click karein.
- 2 **Choose photo** dabaiye.
- 3 Apne menu card ki photo chun lijiye (ya mobile par camera se turant kheench lijiye).
- 4 Thoda intezaar kijiye — ghoomta hua circle dikhega. App photo padh raha hai. **Is beech page band mat kijiye.**
- 5 Neeche list aa jaayegi: **12 ITEMS READY • DOUBLE-CHECK THESE** — ye "DOUBLE-CHECK THESE" likha hona hi ishara hai ki ab aapko check karna hai.

▶ Achhi photo kaise lein (isse galtiyan aadhi ho jaati hain)

✓ Ye kijiye	✗ Ye mat kijiye
Achhi roshni me photo lijiye — din ki roshni sabse behtar	Andhere me ya sirf mobile flash se
Menu ko seedha, samne se kheenchiye (90°)	Tirchha ya bahut angle se
Menu ko samtal (flat) rakhiye — mod na ho	Mudda hua, jhurriyon wala menu card
Ek baar me ek page — 8–10 items tak	Poora 4-page menu ek hi photo me
Photo saaf/sharp ho, text padha jaa sake	Hilti hui (blurry) photo
Simple, saaf font wala menu	Bahut fancy handwriting/design wala font
Chamak (glare) na ho — laminated menu thoda tilt karke	Seedhi light ki reflection menu par

💡 **Bade menu ke liye best tarika** Ek saath poora menu daalne ki jagah, **ek-ek category ki alag photo** lijiye — pehle "Coffee" wala section, phir "Snacks", phir "Desserts". Har baar upload karke check kar lijiye. Isme accuracy bahut zyada hoti hai aur check karna bhi aasan.

► Ab cross-check kijiye — 3 cheezein har item me dekhni hain

Kya check karein	Kaise pakdein
1. Naam sahi hai?	Adhoore ya ajeeb naam dhoondhiye — "Cappuccino" ki jagah "Cappucin", "Cold Coffee" ki jagah "old Coffee". Aise naam POS par staff ko confuse karenge.
2. Price sahi hai?	Sabse zaroori. ₹130 kabhi ₹30 ya ₹1300 ban jaata hai (₹ ka nishaan ya decimal galat padh jaata hai). Har price menu card se milaiye.
3. Koi item chhoot to nahi gaya / do baar to nahi aa gaya?	Upar list me "X ITEMS READY" likha hai. Wo number apne menu card ke items se milaiye. Kam ho to koi item chhoot gaya, zyada ho to koi item repeat ho gaya ya heading galti se item ban gayi.

12 ITEMS READY · DOUBLE-CHECK THESE

Cappuccino	₹130.00	×
Cafe Latte	₹140.00	×
Cold Brew	₹15.00	← ⚠ galat! ₹150 hona chahiye
+ 9 more (is par click karke poori list dekhein)		

► Galti mile to turant theek kar lijiye (upload se pehle)

- 1 Agar 3 se zyada items hain to **" + X more "** par click karke **poori list** khol lijiye. Sirf pehle 3 dekh kar aage mat badhiye.
- 2 Jis item me galti hai, **us row par click kijiye** — chhota **Edit Item** box khulega jisme **Name** aur **Price** hoga.
- 3 Sahi naam/price type kijiye aur **Save** dabaiye.
- 4 Jo item galti se aa gaya hai (jaise "Our Specials" jaisi heading), uske daayein **×** par click karke hata dijiye.
- 5 Sab theek lagne par hi **Continue** dabaiye.

⚠ Upload ke baad bhi ek baar Menu screen par nazar daaliye Items add hone ke baad app aapko **Menu** screen par le jaata hai aur message dikhata hai — *"Added 12 items from the photo. (Scanned on-device — double-check these.)"*

Yahan poori list ache se dikhti hai. Ek final nazar zaroor daal lijiye.

► Agar photo se kuch bhi nahi aaya

Aisa message aa sakta hai: *"Couldn't find any menu items in that photo. Try a clearer, well-lit shot."* Iska matlab hai app photo me se text padh hi nahi paaya. Ye kijiye:

- 1 Achhi roshni me, seedha, saaf photo dobara kheenchiye (upar wali table dekhein).
- 2 Poore menu ki jagah **sirf ek section** ki photo lijiye.
- 3 Phir bhi na chale, to **CSV wala tarika** use kijiye — wo hamesha 100% sahi hota hai.
- 4 Items kam hain to seedhe haath se add kar lijiye — 10 item me sirf 5 minute lagenge.

● **Golden Rule** Photo se aaya hua menu kabhi bhi bina check kiye customer ko bill mat kijiye.

Pehla order lene se pehle 2 minute nikaal kar poora menu ek baar dekh lijiye. Ye 2 minute aapko mahine bhar ki galtiyan se bacha lenge.

7 Menu Item Edit Karna — Pencil Button

Galti baad me pakdi? Koi baat nahi. Menu kabhi bhi, kitni baar bhi badla ja sakta hai. Ye sabse zyada kaam aane wala chapter hai — **photo upload ki galtiyan yahin se theek hoti hain.**

► Kisi bhi item ko edit kaise karein

- 1 Neeche **More** tab par jaaiye.
- 2 **Operations** section me **Menu** par click karein.
- 3 Item dhoondhiye — upar box me naam type kar dijiye, turant mil jaayega.
- 4 Us item ke card par **pencil (✎)** wala button dikhega — **us par click kijiye.**
- 5 Edit form khul jaayega. Ab jo badalna ho badal dijiye:
 - **Name** — galat naam theek kijiye
 - **Price** — galat price theek kijiye (**sabse zaroori**)
 - **Category** — galat category me chala gaya ho to badal dijiye
 - **Photo** — item ki tasveer lagaiye/badliye
 - **Subtitle / Description** — guest ko dikhne wala text
 - **Kitchen Station** — KOT kis station par jaayega
 - **Product Type / Veg-NonVeg** — Veg, Non-Veg, Jain, Eggetarian
 - **Variants** — Half/Full, Small/Large aur unke alag price
 - **Options / Topping Groups** — Extra Cheese (+₹20), Spice Level, wagairah
- 6 **Save** dabaiye. Badlav turant lag jaata hai — POS par bhi aur guest ke QR menu par bhi.

💡 Roz ka kaam — item khatam ho gaya to? Item delete mat kijiye! Use **Unavailable** mark kar dijiye. POS par wo **UNAVAILABLE** dikhega aur order nahi liya jaa sakega. Stock aane par wapas available kar dijiye — saara data (variants, recipe, price) bacha rahega.

✳ Ek saath bahut saare items theek karne hain? Agar photo upload me bahut zyada galtiyan aa gayi hain, to ek-ek karke theek karne se behtar hai: purane items hata dijiye aur **CSV wala tarika** use kijiye. Excel me ek baar sahi list bana lijiye — aage kabhi kaam aayegi.

8 Order Lena — POS Screen

Ab asli kaam. Ye screen aapke staff sabse zyada use karenge — neeche **POS** tab par milegi.

► Pehle order ka type chuniye

Screen me upar chhoti-chhoti pill/button dikhengi. Order shuru karne se pehle sahi wala chuniye:

Type	Kab use karein
Dine In	Customer table par baith kar kha raha hai. Table number choose karna padega.
Token	Counter par order + token number (QSR style). Order seedha kitchen chala jaata hai.
Takeaway	Parcel le jaana hai. Guest ka naam/number le sakte hain.
Delivery	Ghar bhejna hai. Naam, mobile aur address bharna hota hai.
Cash Sale	Sirf paisa lena hai — koi kitchen ticket nahi, kisi dashboard par nahi dikhega. (Jaise chips ka packet bech diya.)

Note: yahan wahi options dikhenge jo aapne Onboarding Step 2 me chune the.

► Cart me items daaliye

- 1 Upar box me naam type kijiye — ya category tabs se browse kijiye.
- 2 Sirf veg ya sirf non-veg dikhana ho to **Veg / Non-Veg** filter dabaiye.
- 3 Item par **ADD** dabaiye — item cart me chala jaayega.
- 4 Agar item me variants/options hain (Half/Full, Extra Cheese) to ek box khulega — chun kar Add kar dijiye.
- 5 Quantity badalni ho to cart me item ke **+** / **-** use kijiye.
- 6 Kuch special kehna ho (jaise "kam meetha", "no onion") to note wale box me likh dijiye — ya list me se ready-made note tap kar dijiye. **Ye note KOT par kitchen ko chhap kar jaata hai.**

► Ab teen raaste hain

Button	Kya hota hai	Kab dabayein
KOT & Print	Order kitchen chala jaata hai aur kitchen ticket print ho jaata hai. Paisa baad me lenge.	Normal Dine In — pehle khana, baad me bill
Pay First	Pehle paisa lena — Settle Bill wala box khulta hai. Chahein to sath me KOT bhi print ho jaayega.	Counter/Takeaway — pehle paisa, phir khana
Save Draft	Cart save ho jaata hai, kitchen nahi jaata. Baad me Saved Drafts se wapas khol lijiye.	Customer soch raha hai / beech me koi aur aa gaya

💡 "Who's serving this order?" Kabhi-kabhi ek box poochhta hai ki ye order kaunsa waiter le raha hai. Sahi naam chun lijiye — isse Reports me pata chalta hai kis waiter ne kitni sale ki.

⚠️ "No tables set up yet" Dine In choose karne par agar ye message aaye, to aapne abhi tak tables nahi banaye. **More → Tables** par jaakar apne cafe ke tables add kar lijiye (T1, T2, T3...). Sirf Owner/Manager hi table add kar sakte hain.

9 KOT — Kitchen Ko Order Bhejna

► KOT hai kya?

KOT = Kitchen Order Ticket. Wo parchi jo kitchen ko batati hai ki kya banana hai, kitna banana hai, aur kis table/token ke liye. Bill customer ke liye hota hai — **KOT kitchen ke liye.** Dono alag cheezein hain.

► KOT bhejna

- 1 Cart taiyaar hone ke baad **KOT & Print** dabaiye.
- 2 Dine In hai to table chuniye; Takeaway/Delivery hai to guest details bhar dijiye.
- 3 Order kitchen chala jaayega aur printer se ticket nikal aayega (printer set na ho to bhi order KDS screen par pahunch jaata hai).
- 4 Usi order me baad me aur item add karna ho? Table/Token dashboard se order kholiye, item add kijiye aur dobara KOT bhej dijiye — sirf **naye items** ka ticket jaayega.

► KDS — Kitchen Ki Screen

Kitchen me tablet/screen ho to **KDS** tab kholiye. Parchi ki zaroorat hi nahi rahegi. Teen view milte hain:

View	Kya dikhata hai
KOT View	Har order ki poori parchi — table/token ke saath. Normal kitchen ke liye best.
Items	Item-wise list — "3 Cappuccino, 2 Latte" — ek jaisa kaam ek saath nipat jaata hai.
Production	Bulk banane ke liye — quantity ke hisaab se, purana order pehle (FIFO).

Upar **All Stations** se apni station chun lijiye (Coffee Bar, Kitchen, Tandoor...) — tab sirf usi station ka kaam dikhega. Kaam poora hone par item/KOT ko ready mark kar dijiye.

📌 Station kahan set hote hain Har menu item ka station uske edit form me hota hai (**Kitchen Station**). Naye station banane ke liye **More → Cafe Settings → Stations**. Printer settings ke liye **More → Cafe Settings → Printers**.

10 Token Orders (Counter / QSR Style)

Jahan customer counter par order karta hai, token number leta hai, aur naam pukarne par le jaata hai — wahan ye screen use hoti hai.

► Token order banana

- 1 POS par order type me **Token** chuniye.
- 2 Items add kijiye.
- 3 Order fire kar dijiye. App turant **token number** de dega — jaise "*Token #14 — sent to the kitchen.*"
- 4 Token slip print ho jaayegi, customer ko de dijiye.

⚠ **Token order rukta nahi hai** Token orders **turant** kitchen chale jaate hain — inhe "hold" nahi kiya ja sakta. Agar customer abhi confirm nahi hai, to **Save Draft** use kijiye.

► Token Dashboard

More → Token Orders — yahan aaj ke saare token orders ek saath dikhte hain.

- **Add Item** — chalu token order me kuch aur jodna ho.
- **Print KOT** — parchi dobara chhapni ho.
- **Cancel KOT** — galti se gaya order kitchen se wapas lena ho.
- **NEW** tag — jo items abhi tak kitchen nahi gaye.
- **+** (FAB) — seedha naya token order shuru karne ke liye.

11 Bill Banana & Settle Karna

Customer ne kha liya, ab paisa lena hai. Ise "Settle Bill" kehte hain.

► Bill kaise settle karein

- 1 Order kholiye — **Tables** se, **Orders** tab se, ya **Token Orders** se.
- 2 **Settle Bill** dabaiye. Poora hisaab dikhega.
- 3 Customer ko pehle bill dikhana ho to **Print Bill** dabaiye (ye "guest bill" hai — paisa lene se pehle wali copy).
- 4 **Payment Method** chuniye: **Cash**, **UPI**, ya **Card**.
- 5 Settle dabaiye. Bas — order complete, paisa record ho gaya.

► Bill me kya-kya dikhta hai

SETTLE BILL	
Subtotal	₹520.00
Bill Discount	– ₹20.00
Tax (GST)	₹25.00
Service Charge	₹26.00
Packing Charge	₹10.00
Delivery Charge	₹30.00
Tip	₹0.00
Round Off	– ₹1.00
TOTAL	₹590.00

In sab par click karke aap **Discount**, **Service Charge**, **Packing**, **Delivery**, **Tip** aur **Round Off** add ya hata sakte hain. Coupon, Gift Card aur Loyalty Points bhi chalu order par lagte hain.

► Split payment — aadha cash, aadha UPI

- 1 Payment Method me **ek se zyada** method select kar lijiye — jaise UPI aur Cash dono.
- 2 Ek method me amount type kijiye (jaise UPI me 300).
- 3 Bacha hua amount doosre method me apne aap aa jaayega.
- 4 Cash zyada mila ho to neeche **"Return ₹__"** apne aap dikh jaayega — chhutta ginne ki zaroorat nahi.

5 Sab match hone par Settle dabaiye.

► **Pay First (pehle paisa)**

POS par **Pay First** dabane par wahi Settle Bill wala box seedha khul jaata hai — order banne se pehle hi. Isme ek extra tick-box hota hai: "**Print KOT when settling**". Ise tick rakhiye taaki paisa lete hi kitchen ko order chala jaaye. (Cash Sale me ye nahi aata — wo kitchen jaata hi nahi.)

💡 **Bill WhatsApp par bhejiye** Settle hone ke baad receipt par **Send via WhatsApp** button aata hai. Customer ka number daal kar bhej dijiye — paper bachega aur customer ka record CRM me bhi aa jaayega.

12 Billing Page — Purane Bills Dekhna

Aaj kitna business hua, kis bill me kya tha — sab yahan.

► Kaise kholein

[More](#) → [Operations](#) → [Billing](#)

► Kya milega

- **TRANSACTIONS** — upar summary: aaj kitne bill bane, kitna paisa aaya.
- **Recent Transactions** — saare bills ki list, sabse naya sabse upar.
- Kisi bhi bill par click kijiye — poori receipt khul jaayegi: items, Waiter ka naam, Subtotal, Bill Discount, Tax, Service/Packing/Delivery Charge, Tip, Round Off, TOTAL aur **Paid Via** (kis method se paisa aaya).
- [Send via WhatsApp](#) — receipt customer ko dobara bhejni ho.

✦ "No transactions yet" Iska matlab sirf itna hai ki abhi tak koi order settle nahi hua. POS se ek order bana kar settle kar dijiye — turant yahan dikhne lagega. Ye koi error nahi hai.

💡 **Aur gehri report chahiye?** [More](#) → [Reports](#) me Sales, Revenue, Profit, Tax/GST, Expense aur Order Detail — sab alag-alag report milti hain. Din/hafta/mahine ke hisaab se filter bhi kar sakte hain.

13 Common Problems Aur Unka Solution

Kuch atak jaaye to pehle yahan dekhiye — 90% cheezein yahin theek ho jaati hain.

► Login & Account

Problem	Solution
Login nahi ho raha	Email ki spelling check kijiye. Password me Caps Lock to on nahi? Aankh wale icon se password dekh lijiye.
Password bhool gaye	Login page → Forgot Access? → email par code → naya password.
OTP email nahi aa raha	Spam/Promotions folder dekhein. 2 min ruk kar dobara bhejiye.
Staff login nahi kar pa raha	Unka password aapne banaya tha — More → Team Portal → Staff Access se reset kar dijiye.

► Menu & Photo Upload

Problem	Solution
"Couldn't find any menu items in that photo"	Achhi roshni me saaf, seedhi photo dobara lijiye. Ek page ki jagah ek section ki photo lijiye. Phir bhi na ho to CSV use kijiye.
Photo se galat price aa gaya	More → Menu → item search → pencil (✎) → price theek → Save. (Part 7 dekhein.)
Kuch items chhoot gaye	Bache hue items haath se add kar lijiye (Part 5, Tarika 4), ya doosre section ki photo dobara upload kijiye.
Ek hi item do baar aa gaya	Menu screen par extra wale ko pencil se kholkar delete kar dijiye.
"Could not read that photo"	Internet check kijiye. File JPG/PNG honi chahiye. Bahut badi file ho to chhoti photo lijiye.
CSV import me rows skip ho gayin	Un rows me naam khaali hai ya price 0/text hai. Excel me theek karke dobara upload kijiye.

► Order, KOT & Bill

Problem	Solution
POS par item hi nahi dikh raha	Menu me item hai? Search box khaali kijiye, Veg/Non-Veg filter hata dijiye, aur dekhein wo UNAVAILABLE to nahi hai.
"No tables set up yet"	More → Tables se apne tables add kar lijiye.
KOT print nahi hua	Printer on aur connected hai? More → Cafe Settings → Printers check kijiye. Order phir bhi KDS par pahunch chuka hai.
Kitchen ko order dikh nahi raha	KDS par sahi station chuna hai? "All Stations" karke dekhiye. Item ka station uske edit form me set hota hai.
Galti se KOT bhej diya	Token Dashboard/Tables se order kholkar Cancel KOT kar dijiye aur kitchen ko bata dijiye.
Settle button dab nahi raha	Payment amount total se match nahi kar raha. Amount theek kijiye ya method dobara chuniye.
Bill Billing page par nahi dikh raha	Wo order Cash Sale to nahi tha? Ya abhi settle hi nahi hua? Settle hone ke baad hi bill list me aata hai.

► App / Screen

Problem	Solution
Screen atak gayi / khaali dikh rahi hai	Page refresh kijiye — Ctrl + R (mobile par neeche kheench kar).
App bahut slow hai	Internet check kijiye. Browser ke extra tabs band kar dijiye. Bahut purana browser ho to update kar lijiye.
Kuch button dikh hi nahi raha	Aapke role me wo permission nahi hogi. Owner/Manager se Staff Access me permission dilwa lijiye.
Data purana dikh raha hai	Ek baar refresh kar lijiye. Do device par kaam ho raha ho to dono ko refresh kijiye.

💡 **Sabse pehla ilaaj** Kuch bhi ajeeb lage to **ek baar page refresh** kijiye (Ctrl + R). Aadhi se zyada dikkatein bas isi se theek ho jaati hain.

14 Madad Chahiye? Hamari Team Se Baat Karein

💡 Agar aapko kahin bhi dikkat aa rahi hai

Kuch samajh na aaye, koi error baar-baar aaye, ya menu/photo upload me phans jaayein — **pareshan bilkul mat hoiye aur khud experiment karke data mat bigaadiye**. Seedha hamari team ko batayiye. Hum aapke saath hain aur aapko step-by-step guide karenge — chahe wo naya cafe set up karna ho, menu theek karwana ho, ya staff ko training deni ho.

Hamse Sampark Karein

📞 Phone / WhatsApp: 7689813155

✉ Email: prabandhos@gmail.com

💡 App ke andar se: **More → Help Center → Support Ticket** — yahan se seedha ticket bana kar bhej sakte hain, hum reply karenge.

► Call/message karne se pehle ye 3 cheezein taiyaar rakhiye

Isse aapki problem 5 minute me solve ho jaayegi:

- 1 **Aapke cafe ka naam** aur wo email jisse aap login karte hain.
- 2 **Screenshot** — jo error aa raha hai uski photo/screenshot bhej dijiye. (Windows par **Windows key + Shift + S**; mobile par normal screenshot.)
- 3 **Aap kya kar rahe the** — jaise "menu ki photo upload kar raha tha aur ye error aaya".

💡 **Naya cafe shuru kar rahe hain?** Poora setup hum aapke saath baith kar bhi kara sakte hain — cafe banane se lekar menu chadhane aur staff ko training dene tak. Bas ek call/message kar dijiye, hum set up karke denge.

✳ Aakhri baat — sabse zaroori 3 cheezein yaad rakhiye

1. Photo se menu upload karne ke baad **har item ka naam aur price zaroor check kijiye**.
2. Koi bhi galti baad me **More → Menu → pencil (✎) button** se theek ho sakti hai — ghabraiye mat.
3. Kahin bhi atak jaayein to **hamari team ko turant contact kijiye**.

— PrabandhOS Team —
Aapka cafe, aapke haath me. 🍷
